*Note:* This list of taxa is essentially an update of Oldroyd's (1980) catalogue and should be reasonably complete. Updated information (**in bold print**) is produced regularly following the appearance of new publications.

This catalogue is incomplete with respect to type repositories. It would be appreciated if additional information relating to excluded taxa or the whereabouts of types or any errors that may be found could be sent to the author.

### INSTITUTIONAL ABBREVIATIONS

Abbreviations as recommended by Arnett & Samuelson (1986)

**Type repositories:** Only primary types (Holotype, Lectotype, Neotype, and Syntypes) are recorded (not Paratypes). ? = information unknown or not recorded as yet. Type information may require confirmation as some may be incorrectly identified.
